

bedphones®

by DUBSLABS

Wireless On-ear Sleep Headphones

Incredibly thin, patented on-ear design fits between your ears and your pillow

Up to 13 hours playback on a single charge

Bedphones® are the ideal alternative to earbuds. Custom 23mm dynamic drivers covered in soft foam lie flat against your ears (not inside them), allowing you to hear your music from the comfort of your bed and throughout your day. Because of their small size and light 23.5g weight, you'll never have to stop listening!

NEVER STOP LISTENING

Memory wire ear hooks conform to the shape of your ears for a custom fit

Inline remote with mic lets you talk and control volume/tracks easily

Bluetooth®

With Bluetooth® wireless technology
